**Reading Endorsement:** If Seniors have completed 90+ hours, have a 3.0 GPA, and have room while completing all their required CORE and ED classes they can take courses towards their **Reading Endorsement**. They should first submit a petition to take a graduate course ([here are instructions to do so](#)), and then just go and register on Banner! They can only take 9 grad hours while UG. The grad hours don't count toward the required 12 UG hrs needed as a full-time student.

\*\*The fourth Reading Endorsement course, ED 5570, will plan to run in the summer of 2024 and 2025.

## Rising Juniors

Need to look and see what Math and Science they've taken. They should have taken ED 1710 (Quant). Some have taken MT 175, MT 177. Some took the STEM sequence (ED 2414, 2424, 2434, 2444). **They all need to take MT 2510 in Fall of 2024. No exceptions.** (If they've already taken MT 251, they do not need to.)

## Rising Sophomores

Highly recommend they reclassify to the 2024-2025 bulletin to align with the new STEM sequence to get core credit. (Otherwise, they'll have to do a lot of petitions.)

Should NOT have taken any Math/SCI classes freshman year, with the exception of ED 1710. If they have *not* taken ED 1710, they will take ED 2431 Junior year.
